

Lesson: Compared to sowing only ginger, it is more profitable to also sow maize, harvest the maize, then sow soybean, harvest the soy, then sow lentil, and finally harvest both lentil and ginger

1. Least productive: sow ginger only

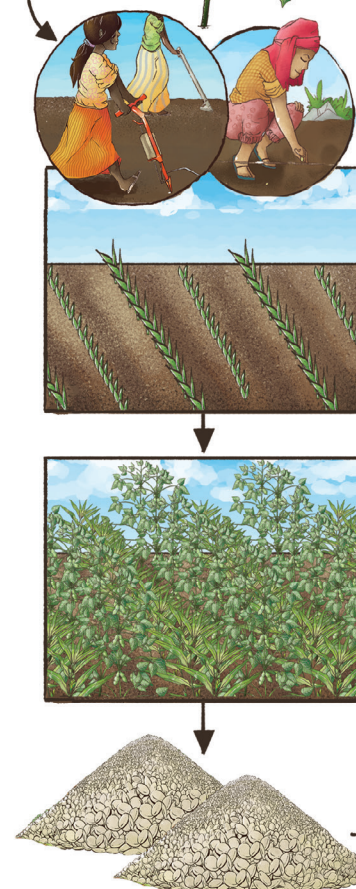

2. Very productive: sow maize and ginger together in alternating rows

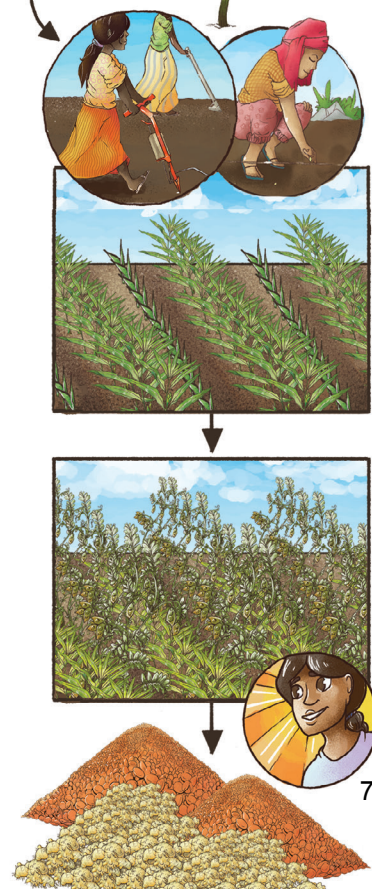

3. Harvest maize only

4. Sow soybean in previous rows of maize in between ginger

5. Harvest soybean only

6. Sow lentil in previous rows of soybean in between ginger

7. Harvest lentil and ginger
