

# Lesson: A greenhouse (plastic tunnel) can improve vegetable production

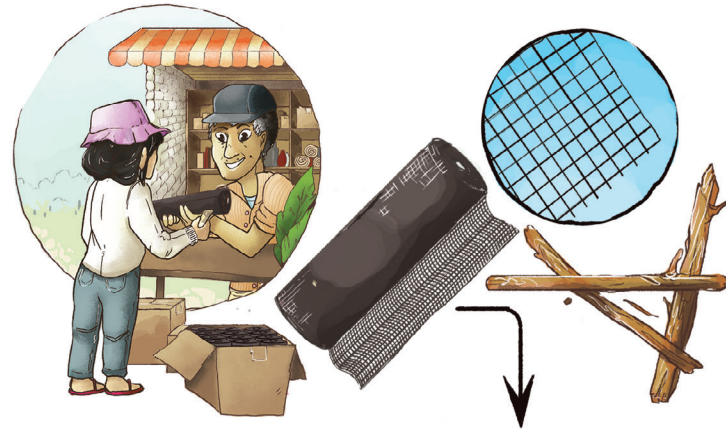

1. Traditional practice: vegetables uncovered

2. Drought, insects, cold or heavy rain damage crops

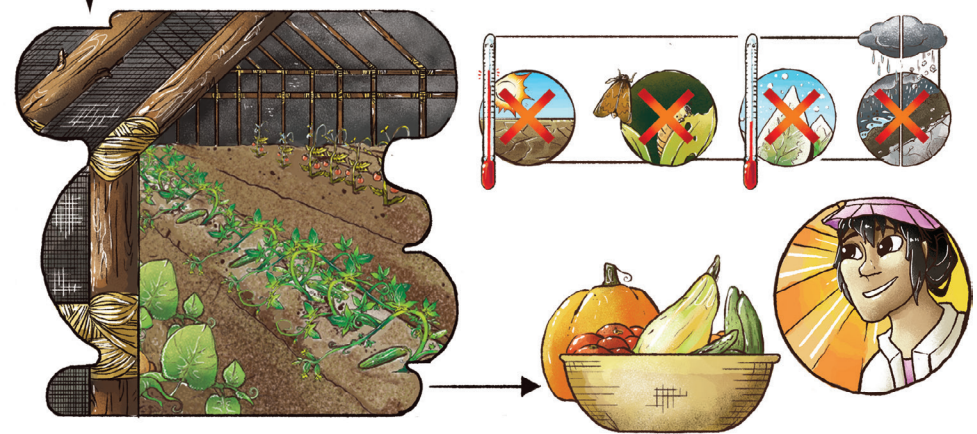

3. Low yield

4. New practice: purchase mesh (if hot such as in tropics)

5. Build greenhouse (high tunnel)

6. Vegetables are protected from drought, insects, cold or heavy rain

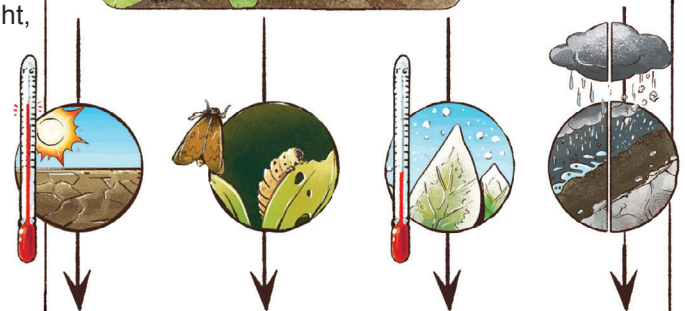

7. High yield

# Lesson: A greenhouse (plastic tunnel) can improve vegetable production

1. Traditional practice: vegetables uncovered

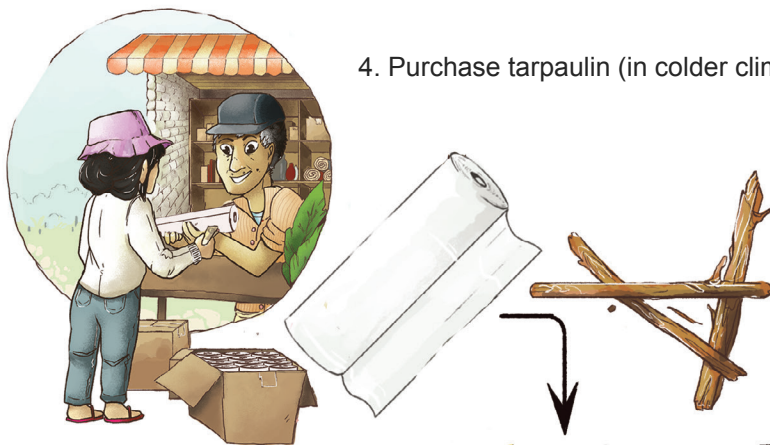

2. Drought, insects, cold or heavy rain damage crops

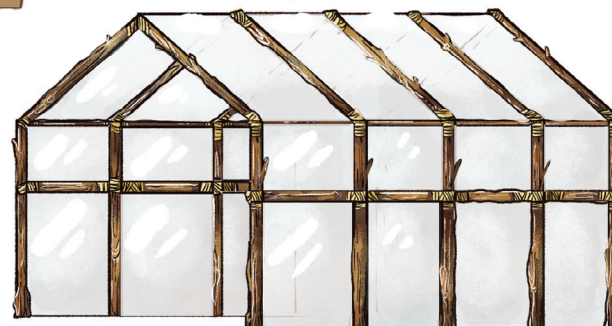

3. Low yield

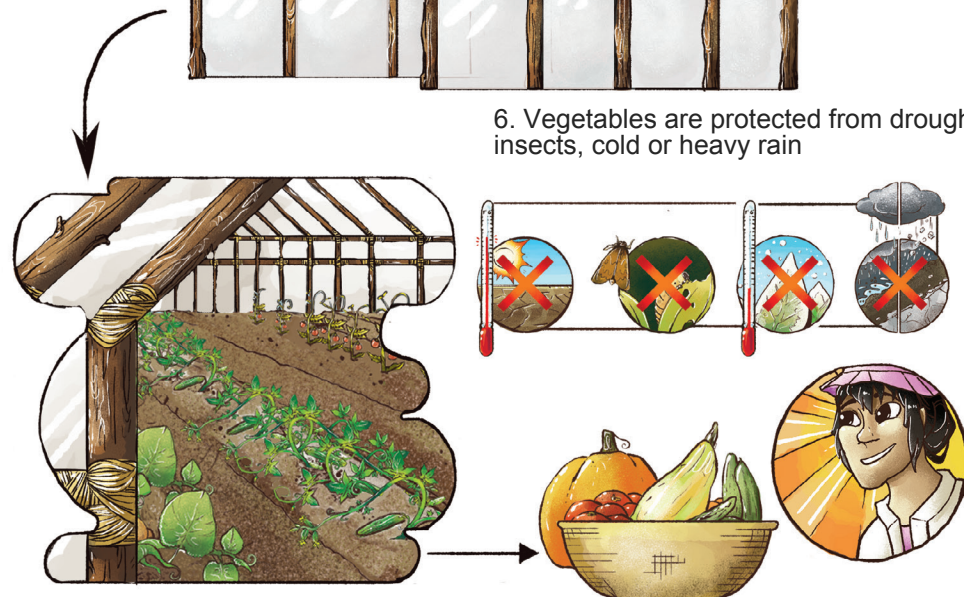

4. Purchase tarpaulin (in colder climate)

5. Build greenhouse (high tunnel)

6. Vegetables are protected from drought, insects, cold or heavy rain

7. High yield
