

Lesson: Climbing chayote squash can be planted at the base of the terrace wall for growth up the wall to maximize usage of the vertical surface area.

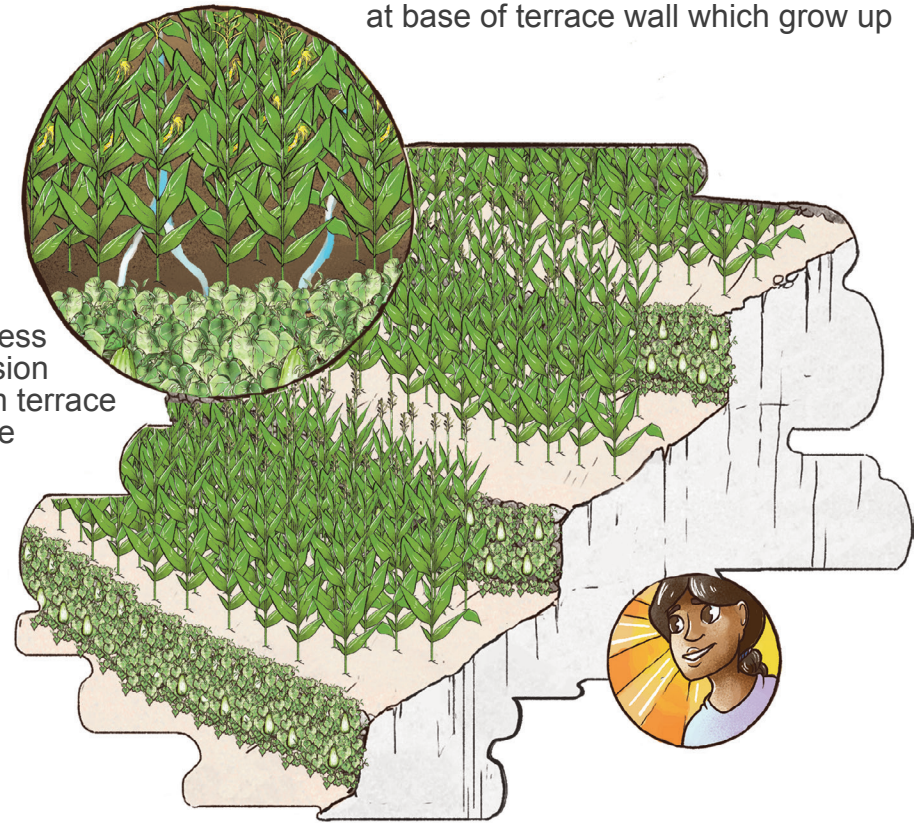

1. Traditional practice: maize or other large crops at terrace edge are stunted

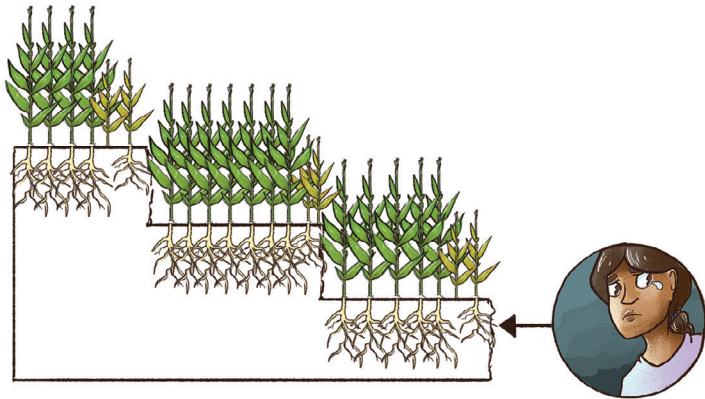

2. Soil erosion at terrace edge

5. Less erosion from terrace edge

4. Improved practice: chayote planted at base of terrace wall which grow up

3. Traditionally, low yield near terrace edge

6. Terrace wall is better utilized
