

Lesson: There are methods to improve the nutrients of manure (Part 1)

1. Traditional practice: livestock urine is not collected

2. Manure gives lower grain yield.

3. New practice: combine urine with manure

4. Higher grain yield.

Lesson: There are methods to improve the nutrients of manure (Part 2)

5. Collect urine by using concrete floor that is sloped towards a pipe, and empties into the manure pit.

7. Store manure in pit or inside mud/stone walls and cover from rain

6. Alternative: urine pipe can go to a drum from which urine can be added to manure

8. High yield

9. Less need to purchase fertilizer
