

Lesson: Covering manure from rain will prevent loss of its nutrients

1. Traditional practice of storing grain in the open on the ground

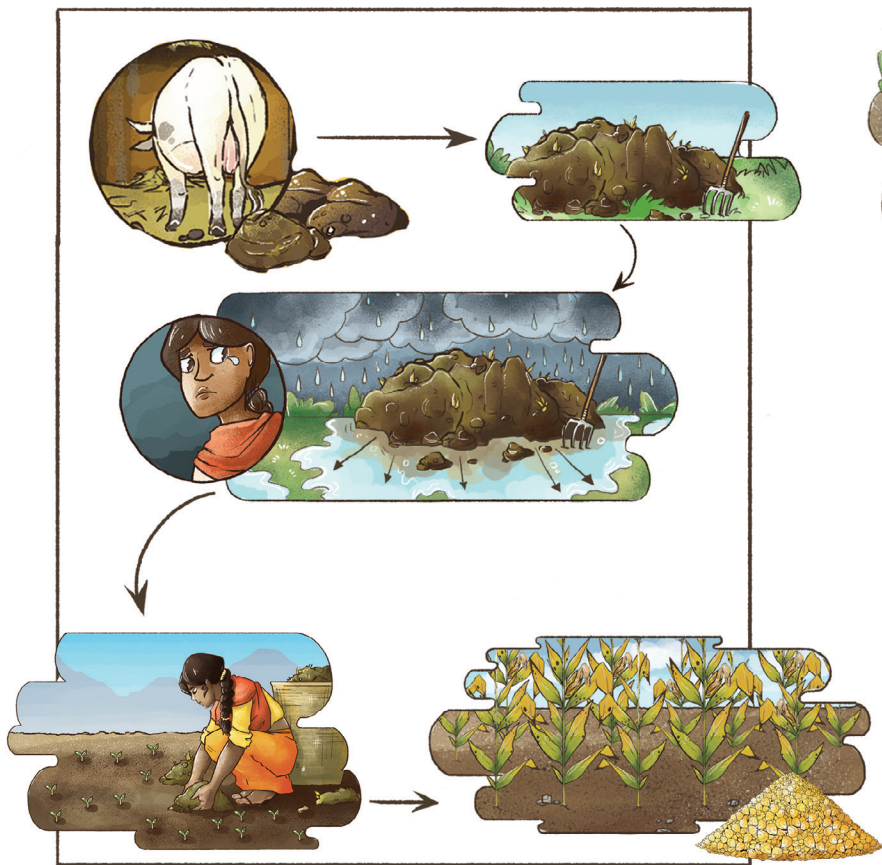

4. Improved practices: store manure in pit or inside mud/stone walls and cover

Lesson: Covering manure from rain will prevent loss of its nutrients

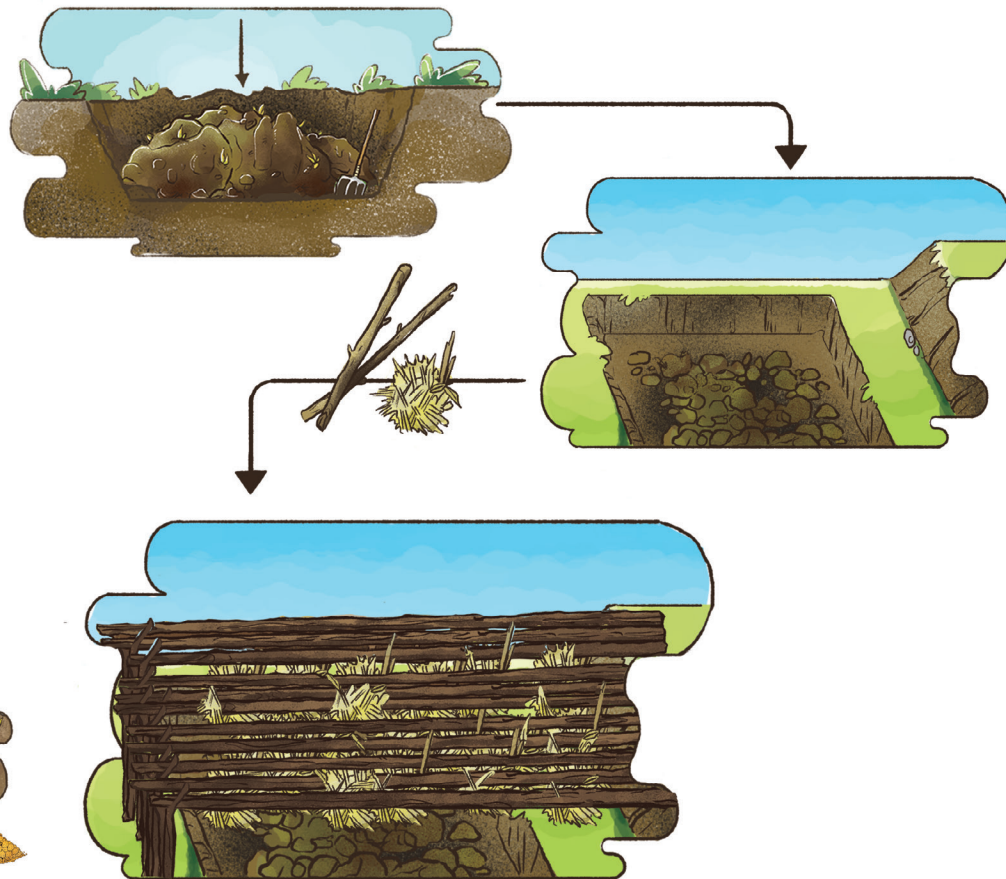

1. Traditional practice of storing grain in the open on the ground

4. Improved practices: store manure in pit and cover with wood and thatch

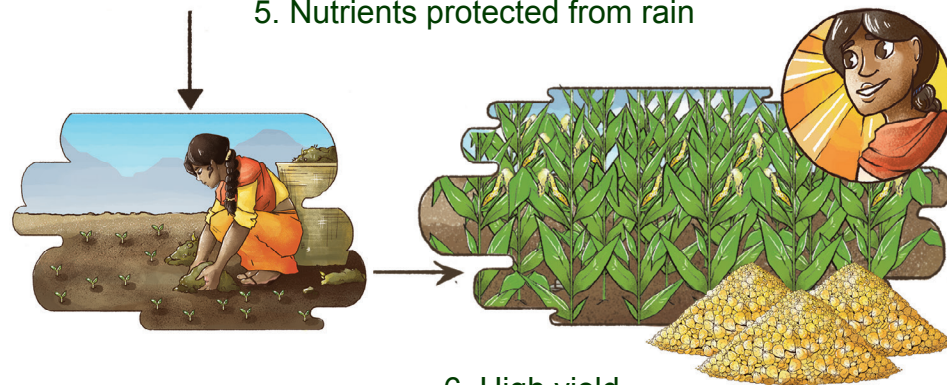

2. Rain causes loss of nutrients

3. Low yield

5. Nutrients protected from rain

6. High yield
