

# Lesson: Covering manure from rain will prevent loss of its nutrients

1. Traditional practice of storing manure in the open on the ground

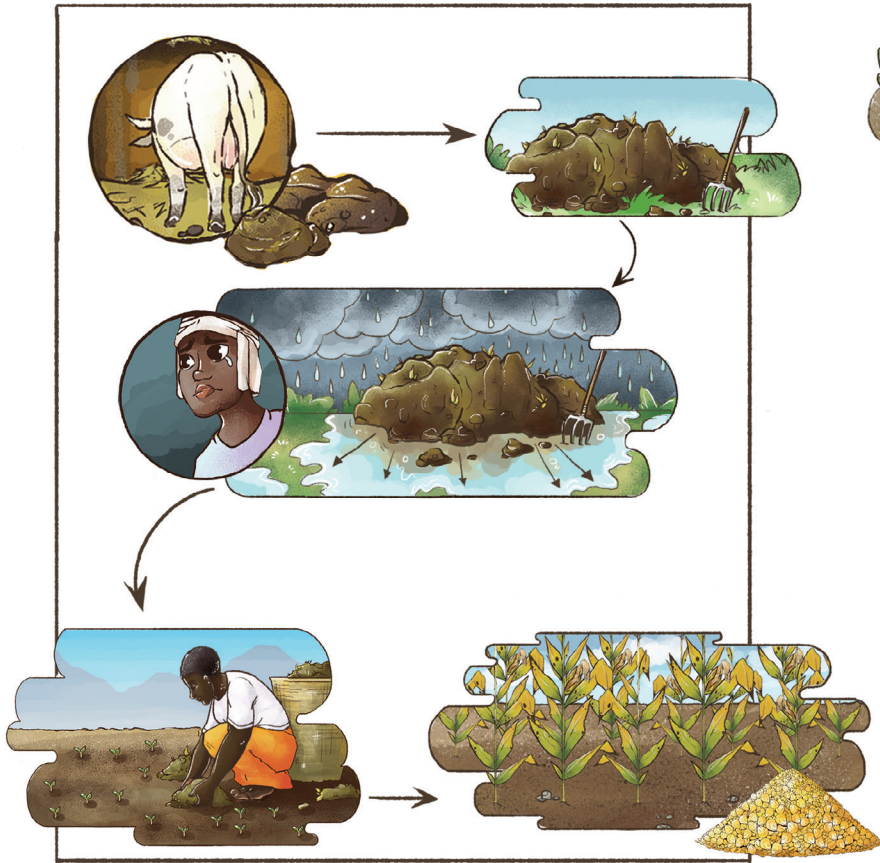

4. Improved practices: store manure in pit or inside mud/stone walls and cover

# Lesson: Covering manure from rain will prevent loss of its nutrients

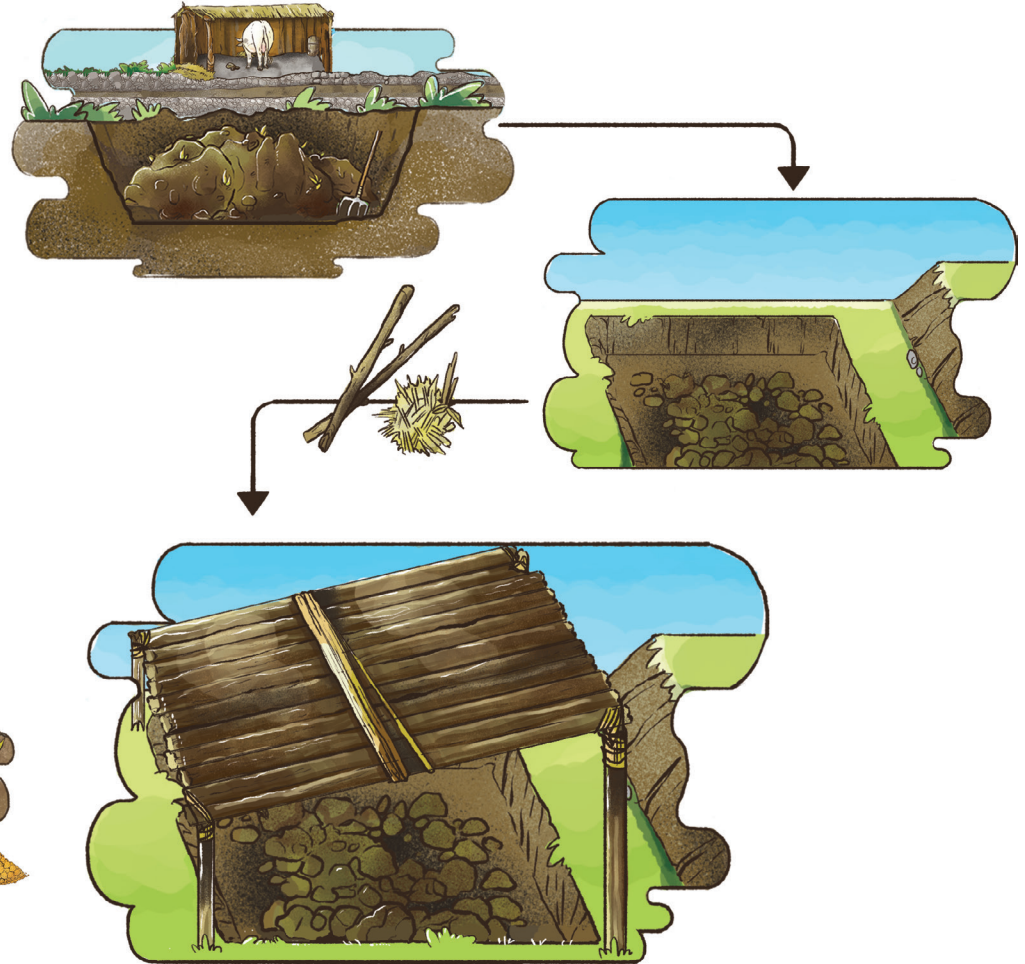

1. Traditional practice of storing manure in the open on the ground

2. Rain causes loss of nutrients

3. Low yield

4. Improved practices: store manure in pit and cover with wood and thatch

5. Nutrients protected from rain

6. High yield
